

ECIB

(Electronic Credit Information Bureau)

Developed By  **zealous**
TECHNOLOGIES

<https://zealoustechnologies.com/>

Project Summary

Electronic Credit Information Bureau (ECIB) is a centralized financial information platform designed to maintain comprehensive credit records for individuals and companies by The State Bank of Pakistan. The system stores and manages credit-related data such as loans, credit cards, repayment history, and defaults, enabling financial institutions to assess creditworthiness before approving loans or financing facilities.

Project Summary

Project Highlights

- Maintains consolidated credit information for individuals and corporate entities, including loan details, credit cards, repayment history, and default records.
- Enables financial institutions to retrieve ECIB reports for evaluating customer creditworthiness prior to loan or financing approvals.
- Utilizes the same User Management System with role-based access control and dual-level approval for all data creation and updates.
- Ensures controlled access to sensitive credit data to prevent unauthorized modifications.

Impact

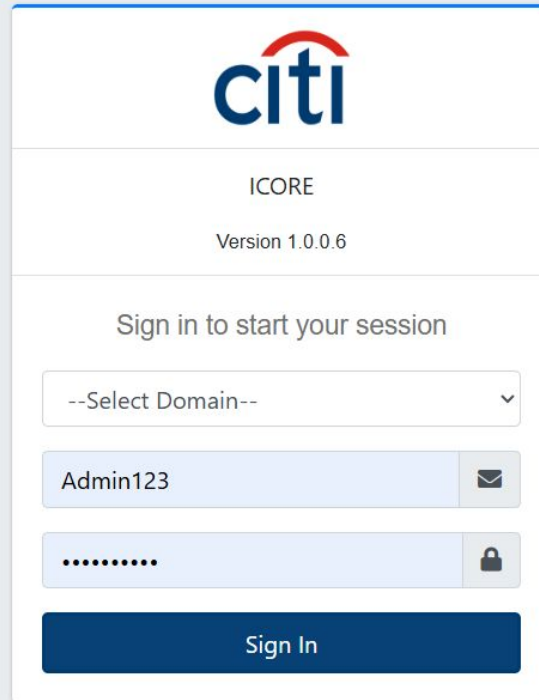

- Supports informed lending decisions by providing accurate and centralized credit information to financial institutions.
- Reduces credit risk by highlighting negative ECIB records that may affect a customer's ability to obtain new credit.
- Strengthens data integrity and security through mandatory approval workflows and restricted user access.

System Architecture

The ECIB application is developed using C# and .NET Core, following an enterprise-grade architecture focused on security, stability, and scalability.

The system integrates the existing User Management module to enforce approval controls and role-based access, ensuring that all credit data is protected and managed in compliance with institutional requirements.

Project Snips

The image shows a login window for Citi ICORE. At the top is the Citi logo. Below it, the text 'ICORE' and 'Version 1.0.0.6' are displayed. The main heading is 'Sign in to start your session'. There is a dropdown menu for domain selection, currently showing '--Select Domain--'. Below this are two input fields: one for the username 'Admin123' and one for the password, which is masked with dots. To the right of each input field is an icon (an envelope for email and a padlock for password). At the bottom is a dark blue 'Sign In' button.
